

NextGen Exam Day Portal Definitions

This document describes the statuses displayed for examinees within an exam session. There are two types of status indicators: the **Session Overview** counts displayed at the top of the session page, and the **Current Location** status shown next to each individual examinee.

Session Overview Definitions

Candidate Filters

- Testing Online:** Candidates actively testing with a live connection.
- Testing Offline:** Candidates with active exam sessions for whom no connectivity updates have been received for the number of minutes shown.
- Inactive / Paused:** Candidates whose exams are paused, exited without completion, offline for 5 or more hours, or closed due to the secure browser exiting.
- Break / Security Screen:** Candidates currently using a break accommodation with the exam timer paused, or who have activated the security screen while the exam timer continues to run.
- Completed:** Candidates who have successfully submitted the exam session.

Waiting for Approval (0)

Last Name	First Name	NCBE Number	Actions
After logging in, candidates will need to be approved for testing. Candidates who are waiting for your approval will appear here. This section will automatically update. Currently, there are no candidates waiting for your approval.

014	Kerning	Assan	12048502	180m	30m	Performance Task

Session Overview

The top of the session page displays a count for each group listed below. These counts provide an at-a-glance summary of examinee activity across the session.

Counter Group	What It Counts
Testing Online	Examinees actively testing with a live connection.

Testing Offline	Examinees with active exam sessions for whom no connectivity updates have been received for the number of minutes shown.
Inactive / Paused	Examinees whose exams are paused, exited without completion, offline for 5 or more hours, or closed due to the secure browser exiting.
Break / Security Screen	Examinees currently using a break accommodation with the exam timer paused, or who have activated the security screen while the exam timer continues to run.
Completed	Examinees who have successfully submitted the exam section.

Current Location

Each examinee row displays one of the following statuses. Statuses are applied in priority order, meaning the first matching condition determines the status shown.

Status Name	Description
Not Started	The examinee has been approved and is in the 5-second countdown before the exam begins.
In Progress	The examinee is actively working in the exam. The row displays their current location within the exam, and the system is receiving regular updates.
On Break	The examinee is using approved off-the-clock break time that does not count against their testing time. Any allotted break time is used before the exam timer resumes.
Security Screen	The examinee has activated the security screen. The exam timer continues to run while the security screen is active.
Completed	The examinee has finished and successfully submitted the exam section.
Session Paused	The Room Lead has paused the examinee's exam. The exam is suspended and the examinee is not actively testing.
Offline (x min ago)	The exam is still active, but no updates have been received for the number of minutes shown. This may indicate a connectivity, device, or software issue. The examinee may still be testing in offline mode.
Abandoned	No updates have been received for 5 hours or more. The exam session remains active but is presumed abandoned due to extended connectivity loss or a device or software issue.
Laptop Closed	The secure browser detected that the laptop lid was closed during the exam.

NextGen Exam Day Portal Definitions

Secure Browser Closed	The secure browser application was closed or exited during the exam.
Closed Due to Violation	The secure browser was closed automatically because a security policy violation was detected.
Inactive	The examinee exited the exam without completing the session. This may result from an inactivity timeout or the examinee voluntarily leaving the exam before submission.
